THE WARM SEASON WORKHORSE IDEAL FOR TOUGH RHIZOMES AND HARD SOIL CONDITIONS

The SH-2150 hand stack harvester has a simple, lightweight cutting head which is easily accessible for servicing and making adjustments for the best quality of cut in soft conditions or peat soil. The fixed Curved and Cross Conveyors are an added safety feature making stacking easier. Mounted on a JOHN DEERE 5065E the SH-2150 has a unique beam pivot point that provides excellent floatation to follow the contours of the ground while the low profile mat is gentle on turf and long on durability. With electric joystick controls that operate the hydraulic functions, this design is easy to operate and reduces heat by keeping hydraulic components away from the operator station.

- Joystick Controls to operate the harvester functions
- Pivoting one piece cutter head and conveyor frame, with hydraulic depth control, floats for uniform & reliable sod thickness
- Independently mounted Curved or Cross Conveyor
- No waste: cuts close to pipes, fences and ditches
- Easy entry with rear piling door for quick service
- Conveyor mat gentle on turf and long on durability
- Stored weights can be added to cutter head to adapt to various conditions

OPTIONAL:

- 4 Wheel Drive
- Brush attachment
- Piling wall extensions
- Fold down pallet carrier
- Selection of starter trays
- Hydraulic Variable Speed Roll Up
- Secondary standing platform – Slabs
- Auto-steer with fine micro adjustment
- Adjustable piling wall for smaller pallets
- Independent cross conveyor for Roll Unit
- Slabbing attachment; independent hydraulic curved conveyor with rollers/brushes, scrapers, and dirt deflector
- Fold down pallet carrier
- 10 in. Ground Roller
- Mechanical Counter
- Coulter side blades
- Water cooler
